EDUCATION

University of Waterloo — B.CS. in Computer Science

GPA: 3.8 / 4.0 | Waterloo, ON

Sept. 2025 – Jun. 2030

EXPERIENCE

Software Engineer — University of Waterloo Orbital Satellite Team

Production Python Backend | Waterloo, ON

Jan. 2026 – Present

- Architected a real-time logging pipeline migrating from flat-file logs to PostgreSQL, reducing log query latency by **~70%** and enabling structured metadata search across **10,000+** daily log entries
- Engineered a custom loguru + SQLAlchemy sink for structured log ingestion, improving post-mortem debugging speed for an **8-person** engineering team
- Resolved multi-threaded concurrency deadlocks by isolating DB engine scopes, achieving **zero** deadlock incidents since deployment
- Contributed **15+** reviewed PRs to a production Python codebase following rigorous Git PR workflows with ruff linting

Co-Founder & President — Chinguacousy Web Development Club

Student-Led Technical Education Initiative | Brampton, ON

Feb. 2023 – Jun. 2024

- Founded and scaled a school tech club from **0 to 200+** active members — one of the largest student-led coding organizations in the Peel District School Board
- Designed a **10-week** HTML/CSS/JS curriculum; students shipped **30+** personal portfolio websites by semester end

Youth STEM Specialist — Brampton Public Library

Weekly Educational Workshops | Brampton, ON

Jan. 2023 – Dec. 2023

- Delivered weekly Python workshops to **20–30** elementary students per session, logging **200+** total instructional hours over the program year
- Designed hands-on projects that increased student engagement scores by **40%** vs. prior lecture-only sessions per library feedback surveys

PROJECTS

Resume Screening ML API | Python, NLP, FastAPI, SQLite, Docker

Dec. 2025 – Present

- Deployed a production-ready ML REST API using FastAPI scoring resume-to-job fit in under **200ms** per request
- TF-IDF + cosine similarity NLP pipeline achieving **87% precision** on a labeled test set of **500** resume-job pairs with Pydantic schema validation
- Dockerized full stack reducing environment setup from **~30 min** to a single **docker-compose up** command

OpportunatE | Pandas, Scikit-learn, Gemini API, Flask

March 2026

- **Runner-Up — Best Use of Gemini API** at Hack Canada 2026 (**200+** participants, 12 universities); built a data analytics dashboard on Canadian immigration trends
- Merged **5+** Statistics Canada datasets across **57 raw columns**, engineering **12 features** to surface actionable immigration and labour market signals
- Integrated Gemini API chatbot answering natural-language queries over the dataset in **<2s** average response time

FanFinder | Pandas, Scikit-learn, Flask

April 2026

- Built a player recommendation engine using KNN (k=5) and K-Means clustering, ingesting **5+ datasets** of **700+ players** from the 2025–26 UEFA Champions League via a custom data pipeline
- Flask REST API returning personalized recommendations in under **150ms**; achieved **91%** user-satisfaction rate in a 50-user beta

AWARDS

President's Scholarship of Distinction (\$4,000) | **Hack Canada Runner-Up — Best Use of Gemini API** | **Gr. 12 Advanced Functions: 99%** | **Gr. 12 Data Management: 98%**

TECHNICAL SKILLS

Languages: Python, C/C++, SQL (PostgreSQL, SQLite), HTML/CSS, JavaScript, Racket

Frameworks & Libraries: FastAPI, Flask, Django, SQLAlchemy, TensorFlow, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly

Developer Tools: Git, Docker, Linux/Unix, Bash, VS Code, GDB, AddressSanitizer, Makefile

Mathematics: Linear Algebra, Calculus, Optimization, Regression, Probability & Statistics
